

# Radha Krishan Resort Management System

Final Project Report

## 1. Introduction

The Radha Krishan Resort Management System is a role-based digital platform designed to streamline hotel operations such as room bookings, event management, inventory tracking, and administrative control. The system focuses on improving efficiency, reducing manual work, and enhancing guest experience.

## 2. Objectives

- Automate front desk operations
- Provide secure access for staff and admin
- Manage rooms, events, and inventory efficiently
- Generate reports for business decision-making

## 3. User Roles

Admin: Controls system configuration, pricing, staff, and reports. Front Desk Staff: Manages bookings, check-ins, check-outs, and event planning. Guest: Books rooms and events using OTP-based authentication.

## 4. System Features

- Dual authentication (Password & OTP)
- Room booking and availability management
- Event planning with decoration themes
- Inventory and resource management
- Reports and analytics dashboard

## 5. Front Desk Module

The front desk interface allows staff to add bookings, check-in guests, manage check-outs, plan events, and view daily schedules. It is designed for fast operations and ease of use.

## 6. Admin Module

The admin panel enables management of staff accounts, rooms, pricing rules, event configurations, system settings, and business reports. Admin access ensures centralized control.

## 7. Database Design

Key tables include Users, Rooms, Bookings, Events, Themes, and Inventory. The database supports relational mapping for efficient data storage and retrieval.

## 8. Technology Stack

• Frontend: Web-based UI (HTML/CSS/JS or Figma prototype) • Backend: Node.js / Django / PHP (conceptual) • Database: MySQL / PostgreSQL • Design: UI/UX principles with low and high-fidelity wireframes

## **9. Advantages**

• Reduced manual errors • Faster guest service • Better event coordination • Improved revenue tracking • Scalable for future expansion

## **10. Conclusion**

The Radha Krishan Resort Management System provides a complete digital solution for hotel and event operations. The system improves efficiency, enhances user experience, and supports data-driven decision-making, making it suitable for real-world deployment.
